1
Model
Logistic regression
Explainable boosting machine
Gradient boosted trees
2
Explanation method
SHAP, LIME, DiCE,
Anchors, Wachter
3
Notice
Up to four principal reasons
after the direction rule
4
Six tests
E1 Direction
E2 Accuracy
E3 Specificity
E4 Selection
E5 Prohibited bases
E6 Recourse
per factor contributions
Commentary methods
Marginal applicant method
Average applicant method
contributions and the reasons selected from them
Reference notices
Canned notice
Random notice
built for the same applicants
